

New Zealand's Leading Digital Mobile Radio Network Locally Owned and Operated

# **PUSH** WIRELESS

Powered by

Indicative Coverage Only

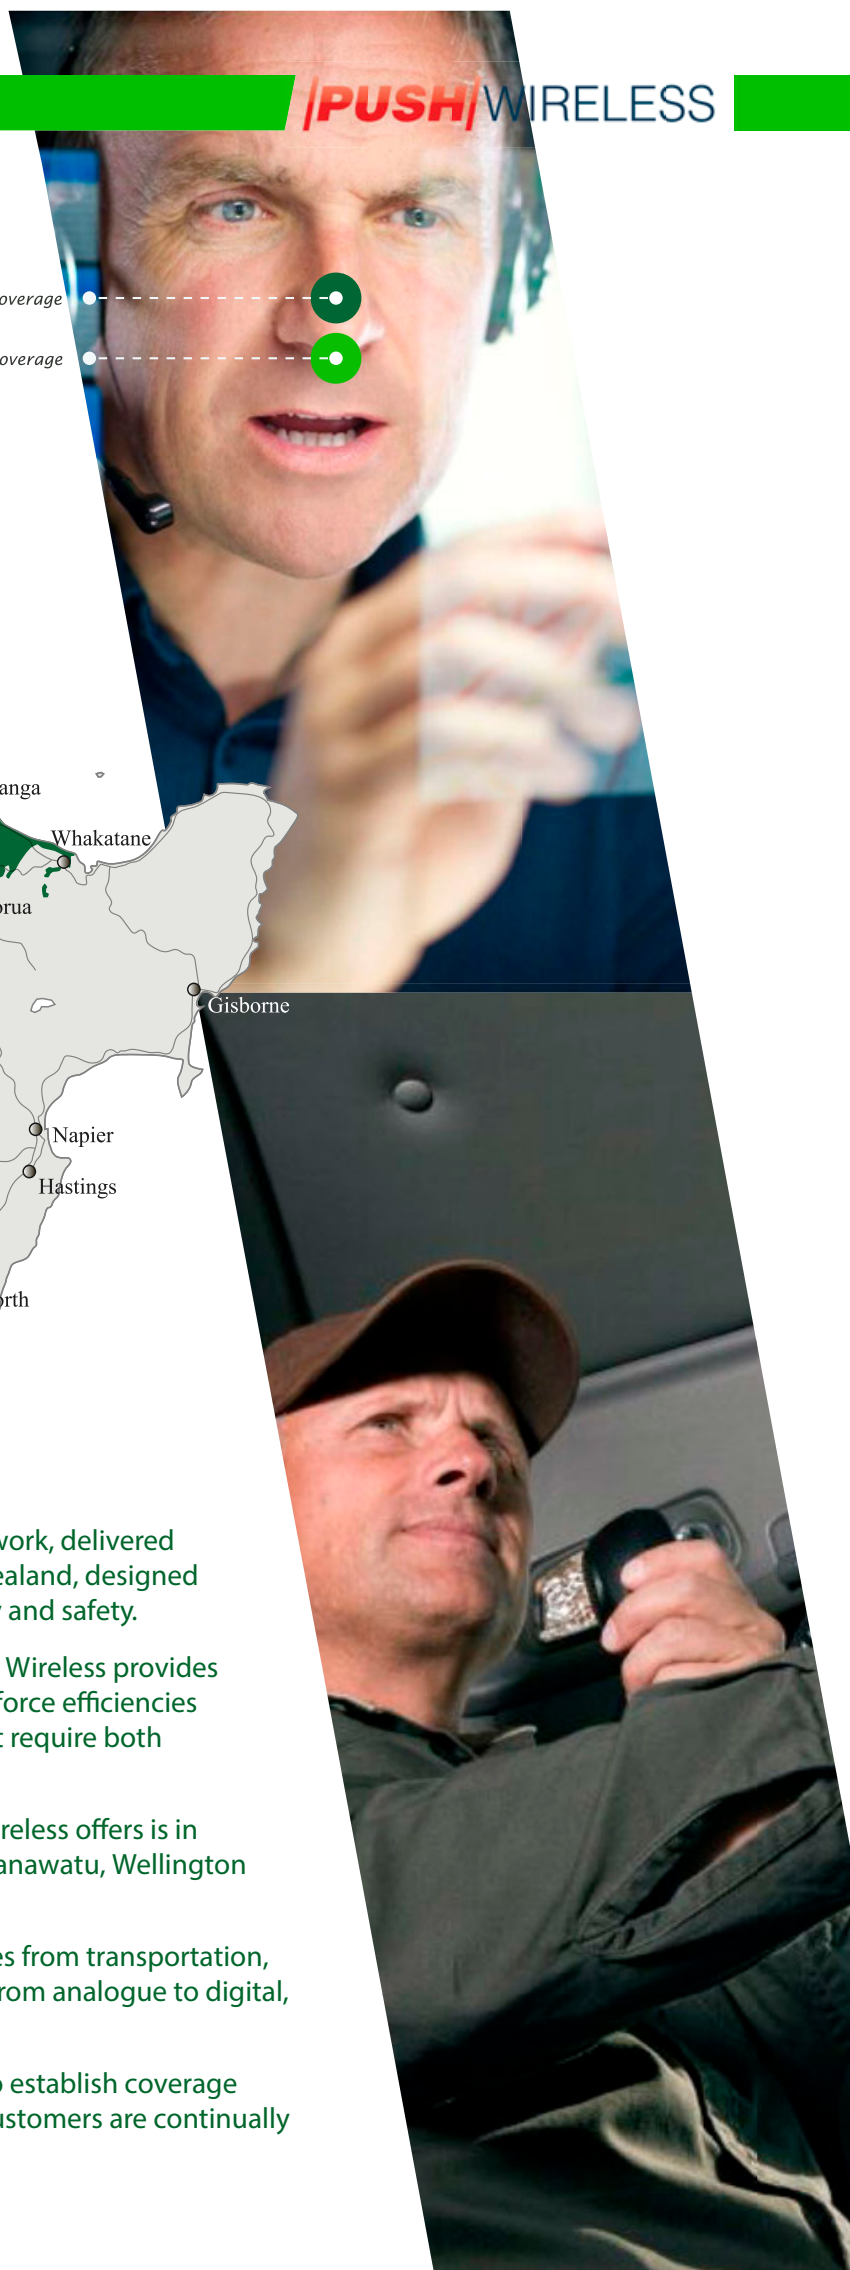

Push Wireless is a wide area Digital Mobile Radio Network, delivered to you by Tait authorised partners throughout New Zealand, designed to optimise team communications, worker's efficiency and safety.

Powered by Tait DMR Tier-3 trunked technology, Push Wireless provides a digital communications platform that delivers workforce efficiencies and operational benefits to business critical users that require both reliable voice and data services.

The initial UHF Digital Mobile Radio Coverage PushWireless offers is in Auckland, Waikato, Bay Of Plenty (BOP), Wairarapa, Manawatu, Wellington and Christchurch.

Push Wireless has already seen a number of businesses from transportation, security, roading infrastructure and councils migrate from analogue to digital, to increase safety and improve operations.

PushWireless is working closely with our customers to establish coverage needs and offer wider coverage across the country. Customers are continually coming on the journey with us.

**Move from Analogue to Digital with ease**  
Migrate at your own pace, one talk group at a time.

**Hear and be heard clearly in noisy environments**  
Reduces and removes background noise and ensures crystal clear communications.

**Stay in touch with your workforce wherever they go**  
Ensure when a call is critical you have full network capability.

**GPS Tracking Services**  
Have visibility of your people and assets in the field and utilise our integrated mapping and reporting solution to provide enhanced Health & Safety.

**Data Services**  
Push Wireless is a data platform for text messaging and customisable data solutions, reducing costs and improve reliability of information.

**ManDown & LoneWorker**  
Apps that take over communications when staff cannot communicate
