

Mobile Antennas

CB Aerials

The Hi-Tec range of Citizen Band aerials features 5 models for mobile installations.

The mobile models feature a top loaded helical, wound on solid fibreglass rod and covered with black LVR heat shrink plastic. They are available in either a pretuned (PT), or fully tunable (A) configuration.

Also available is a pretuned centre loaded model only 1m high (CB1CL). The coil assembly is fitted to the centre of a stainless steel whip, and is ideal for vehicle installations with height restrictions or where a slim flexible aerial is required.

MODEL	Description
CB1CL	CB Aerial - 1.2m Centre Loaded Stainless Steel Whip
CB12A	CB Aerial - 1.2m with Adjustable Tuning
CB12PT	CB Aerial - 1.2m Pretuned
