Fleetview allows real time visual access for Viewtech Fleetview mobile DVR units.

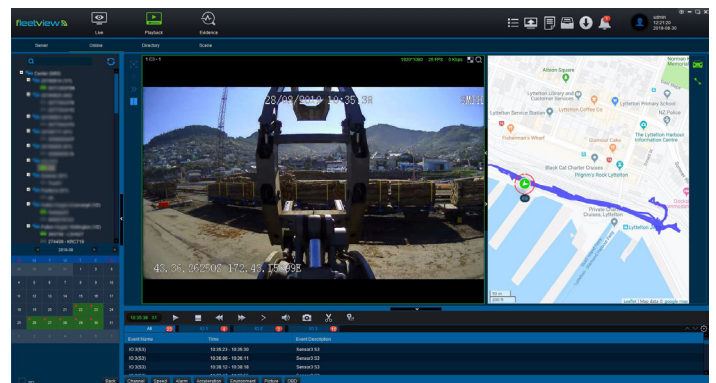

Save time and money by remotely downloading event videos and receive alarms if there are system faults ensuring that your systems are always working when they need to be.

MAIN FEATURES

- Live view video from your Fleet
- Replay events
- Receive real time alarms on any electrical input, G-force, system errors, A.I Inputs like human or pedestrian detections
- Extract HD videos over the air
- Save time and money trying to manually retrieve footage.

WORKS WITH

Fleetview works with Viewtech Fleetview mobile DVR units, cameras and monitors. This provides an all-round and comprehensive mobile DVR and video platform which can be integrated with monitors for operator blind spot monitoring.

PEDESTRIAN DETECTION

Fleetview also works with Viewtech A.I Pedestrian detection cameras and real time pedestrian present alarms can be fed into Fleetview for easy review.

MOBILE APP

A mobile app also provides realtime access to Fleetview when ever you need it. Simply open the app, click on a vehicle and see real time video, location and alarm data. Push notifications can also be setup based on alarm inputs and conditions.
